

Meeting Report – 24/11

The meeting lasted approximately **45 minutes** and aimed to clarify the objectives for the upcoming week. The main points discussed were:

Recap of the Previous Week

Last week, the team successfully:

- Set up the initial **GitHub organization** and the **mirror repository**
- Completed the first round of **PoCs** (mobile, web, backend, database)
- Started brainstorming the **logo** and **application name**

Summary of the Previous Week

The first week went **very well**, and the team is satisfied with both the PoCs and the project's initial structure. This solid start enables us to move forward confidently.

Objectives for the Week

1. Defense Presentation

- Prepare the **PowerPoint** for the defense, including:
 - Our project organization
 - The PoCs completed by each member

2. Backend Architecture

- Begin defining the **backend architecture**, its structure, and internal communication.

3. First Functional Feature: Login System

- Start implementing a **login with username/password**, connecting:
 - Web frontend
 - Backend
 - Database
- Consider **data security**, especially password hashing using **bcrypt**.

4. Documentation

- Begin writing the **project documentation** to improve clarity and long-term maintainability.
