

Meeting Report – 01/12

The meeting lasted approximately **1 hour** and aimed to clarify the objectives for the upcoming week. The main points discussed were:

Recap of the Previous Weeks

Over the past two weeks, the team has:

- Set up the initial **GitHub project structure** and **mirror repository**
- Completed the **PoCs** for mobile, backend, web, and database
- Prepared for and delivered the **first defense**, which was successful
- Finalized the first functional feature: **simple register & login system**
- Designed the initial **backend architecture**

Overall, the progress has been strong, and the evaluator's feedback confirmed the relevance of our chosen technologies.

The main point to improve remains the **description quality of GitHub tickets**.

Summary of the Previous Weeks

The team is **very satisfied** with last week's progress and the positive results of the defense. Most of the planned development tasks were completed:

- Simple **register & login** system
- Initial **backend architecture** defined

Only the **ticket descriptions on GitHub** need to be improved.

Objectives for the Week

Backend & Database

- Implement the **core backend workflow**
- Coordinate with frontend teams to integrate **OAuth**

Web & Mobile

- Develop the **main page** (the one displaying the areas)
- Start implementing **OAuth** on both platforms

Organizational

- Review and rewrite ticket descriptions using a **standard template**
- Prepare the **Sprint 4 tickets**

General Tasks

- Write documentation for each team member's code
- Add **unit tests**
