

Meeting Report – 17/11

The meeting lasted approximately **30 minutes** and aimed to clarify the objectives for the upcoming week. The main points discussed were:

Weekly Objectives

1. Project Organization

- Set up the **GitHub project workflow**
- Configure the **mirror repository**

2. PoC Distribution

Each member was assigned a specific Proof of Concept:

- **Bastien** → Backend
- **Corto** → Database
- **Anthony** → Mobile
- **Maria** → Web

3. Technologies to PoC

The team must validate the following technologies:

Mobile

- Flutter
- Kotlin (Android)
- React Native

Frontend Web

- React
- Vue
- Angular

Backend

- Go
- FastAPI
- [Node.js](#)

Database

- PostgreSQL
- MySQL
- MongoDB

4. Branding

- Begin thinking about the **logo** and **application name**
